This is our chance to stand up and be counted. Being counted is critical to us for so many reasons—seniors, minorities, and those with disabilities are historically undercounted. Being counted helps fund the many needed programs offered to the citizens in Dodge County. There will be three ways to respond to this seven question census—online, by phone, or by mail. The ADRC staff will be offering opportunities to assist if needed in completing the census, and to answer questions. Look for details in the next few months or go to www.census.gov. April 1, 2020 is Census Day.

The 2020 Census at a Glance...counting everyone once, only once, and in the right place.

The U.S. Census Bureau is the federal government’s largest statistical agency. We are dedicated to providing current facts and figures about America’s people, places, and economy. Federal law protects the confidentiality of all individual responses the Census Bureau collects.

The U.S. Constitution requires that each decade we take a count—or a census—of America’s population.

The census provides vital information for you and your community:
- It determines how many representatives each state gets in Congress and is used to redraw district boundaries. Redistricting counts are sent to the states by March 31, 2021.
- Communities rely on census statistics to plan for a variety of resident needs including new roads, schools, and emergency services.
- Businesses use census data to determine where to open places to shop.

Each year, the federal government distributes more than $675 billion to states and communities based on Census Bureau data. In 2020, we will implement new technology to make it easier than ever to respond to the census. For the first time, you will be able to respond online, by phone, as well as by mail.

We will use data that the public has already provided to reduce follow-up visits. And, we are building an accurate address list and automating our field operations—all while keeping your information confidential and safe.

Hello! My name is Briann Susdorf. I am the new Elder and Disability Benefit Specialist at the ADRC. My position is brand new here in Dodge County. As both an Elder and Disability Benefit Specialist, I have the ability to help out with both age groups! My past experience includes working for the Disability Determination Bureau (DDB) and doing Elder Case Management for one of Dane County’s focal points, which created a wonderful background to step into this role. I started here in October and have been super busy building on my knowledge of the Social Security Administration to be able to serve Dodge County effectively. If you are looking for extra help applying for Social Security, Medicaid, Medicare, or need assistance with understanding the realm of public benefits and what you may be eligible for, a Benefit Specialist on our team would be happy to assist you!

Your time is valuable to us! For speedier service for you, we encourage you if at all possible to call and make an appointment with a resource specialist before stopping in to see us. You can always call or email the ADRC with any of your questions.

Watching for Hypothermia

Hypothermia is a drop in body temperature that is caused by staying in a cool place for too long. This may bring to mind images of someone who is lost outside in a blizzard, but hypothermia can strike a person in their own home where the heat is turned down too low. A body temperature below 96 degrees can cause an irregular heartbeat leading to heart problems and even death if not treated promptly. Hypothermia is especially dangerous because it happens gradually and affects your thinking. You may not even realize you need help!

As caregivers, it is important to be aware of the symptoms and risks of hypothermia as people with advanced age are especially vulnerable. When checking in on your relatives, friends or neighbors, be especially aware of the symptoms of hypothermia.

- Confusion or sleepiness
- Slowed, slurred speech or shallow breathing
- Weak pulse or low blood pressure
- Cold, pale skin
- A lot of shivering or stiffness in the arms or legs
- Chilly rooms or other signs that they have been in a cold place
- Poor control over body movements or slow reactions

If you think someone may have hypothermia, take his/her temperature and if it doesn’t rise above 96 degrees, call 9-1-1. It is very important that a person with hypothermia is treated by a physician.

Sometimes people are tempted to turn their thermostats down too low as a way of saving money on their energy bill, but this can result in a dangerous situation. It is essential for people to keep their homes warm by setting the thermostat to at least 68 degrees.

There are some things you can do to keep yourself warm and cut down on heating costs such as closing vents and doors to rooms you are not using. Wearing several layers of loose clothing and eating enough food to keep up your body weight will also help you stay warmer in your house. Additionally, you can also call your power or gas company for information on weatherizing your home. If paying for heat is a problem due to a limited income, you may qualify for help through the Energy Assistance Program. Contact Energy Services 920-887-7990. May you have a happy and safe winter!

Greater Wisconsin Agency on Aging Resources

Helping Someone? You Can Help Us Help You

We are pleased to announce that in 2019 we here at the ADRC were part of starting a coalition of people who want to help caregivers. We are all people who are involved in caregiving in some way. We are the Community Caregiver Alliance of Dodge County.

Our vision: To be the resource for providing solutions to educate, empower, and embrace caregivers in our community.

Our mission: To recognize, educate, support, and provide resources for family and community caregivers.

HOW YOU CAN HELP:
- Join us if you are able! (3rd Weds of every month at 1:00 pm here at the Henry Dodge County Office building)
- Watch for our survey and honestly tell us about your needs
- Call and let us know what we can do to help 920-386-3259
YOUR BENEFIT NEWS

2020 Medicare Numbers Released

The Centers for Medicare & Medicaid Services (CMS) announced the 2020 premiums, deductibles, and coinsurance amounts for Medicare Parts A and B. Medicare Part A covers inpatient hospital stays and rehabilitation care at a skilled nursing facility. According to CMS, more than 95% of beneficiaries receive premium-free Medicare Part A because they at least 40 work quarters paying into Medicare taxes.

Medicare Part B covers physician services, outpatient hospital services, durable medical equipment at home, outpatient rehabilitation therapies, and outpatient laboratory services and testing. All beneficiaries pay a Part B premium (unless qualify for a premium subsidy).

Typically, Medicare Part B provides insurance coverage on an 80/20% basis. To see if you are eligible for assistance in paying the premium, call our office.
Memory Screens are Coming to Your Local Library in 2020!

Memory screens will be available to participating libraries the 2nd Tuesday of each month from 12:30 - 3:30 pm starting in March.

A memory screen is a wellness tool that helps identify possible changes in memory and cognition; it creates a baseline of where a person is at so that future changes can be monitored.

Early detection is important. Treatment is possible! Some types of dementia are reversible, like those caused by nutritional and vitamin deficiencies, depression, thyroid issues, and more.

Call Rob Griesel at the ADRC of Dodge County for more information or to schedule your memory screen. 920-386-4308

Check out page 2 to see the dementia friendly business recap for the year 2019!
Genetic Testing Fraud
Tips for Protecting Yourself and Medicare

Genetic testing scams are currently a widespread issue throughout the country. Scammers are offering Medicare beneficiaries cheek swabs for genetic testing to obtain their Medicare information for identity theft or fraudulent billing purposes.

What is Genetic Testing Fraud?
Genetic testing fraud occurs when Medicare is billed for a test or screening that was not medically necessary and/or was not ordered by a beneficiary’s treating physician.

What are Examples of Genetic Testing Fraud?
• A company offering you “free” testing without a treating physician’s order and then billing Medicare. These tests go by many names and claim to test for many things. Here are some examples of ways you may see this advertised:
  - Cancer screening / test
  - DNA screening / test
  - Hereditary cancer screening / test
  - Dementia screening / test
  - Parkinson’s screening / test
  - Pharmacogenomics – medication metabolism
• A company providing a test or screening that you never requested or that you do not need
• A company billing Medicare for screening services that are not covered by Medicare or for screenings that do not apply to you
• A company requesting your Medicare number at a community event, a local fair, a farmers’ market, a parking lot, or any other event

What Happens if Medicare Denies the Genetic Test Claims?
• You could be responsible for the entire cost of the test! The average is $9,000-$11,000.

What Can You Do to Stop Genetic Testing Fraud?
• Be sure your doctor has assessed your condition. Although Medicare covers many genetic tests for diagnostic use, it only covers one preventive genetic test to screen for cancer.
• Do not give out your personal information or accept screening services from someone at a community event, a local fair, a farmers’ market, a parking lot, or any other event.
• Always read your Medicare Summary Notice (MSN) or Explanation of Benefits (EOB). The words “gene analysis,” “molecular pathology,” or “laboratory” may indicate questionable genetic testing has occurred.
• If you received a cheek swab or a screening that was not medically necessary, report your concerns about billing errors or possible fraud and abuse to your local SMP.

When are Genetic Tests Covered?
• When someone has stage III or IV cancer
• When the test is medically reasonable and necessary Federal regulations define medical necessity as “services or items reasonable and necessary for the diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member.”
• When it is ordered by a treating physician Federal regulations define a treating physician as “the physician who furnishes a consultation or treats a beneficiary for a specific medical problem and who uses the results in the management of the beneficiary’s specific medical problem. Tests not ordered by the physician who is treating the beneficiary are not reasonable and necessary.”
• When one or more coverage requirements are met for colorectal cancer genetic screening. There is no other Medicare coverage for genetic testing as a screening service.
• When a treating physician orders the test as a diagnostic service and uses the results to manage the patient’s condition.

TOBACCO PREVENTION AND CONTROL PROGRAM: E-CIGARETTE PUBLIC HEALTH ADVISORY

This health advisory is being issued by the State Health Officer to inform the public about the alarming statistics on current e-cigarette use among youth in Wisconsin. In Wisconsin, current e-cigarette use among Wisconsin high school students increased 154% between 2014 and 2018. In 2014, just under 8% of Wisconsin high school students were using e-cigarettes. In 2018, that number has skyrocketed to 20% (or one out of every five students).

As Surgeon General Jerome Adams recently described in his Advisory Report, nicotine exposure during adolescence can harm the developing brain, which continues to develop until around age 25, and can impact learning, memory, and attention.

The e-cigarette aerosol that users inhale and exhale can expose both the user and those around the user to other harmful substances, including heavy metals, volatile organic compounds, and ultrafine particles that can be inhaled deep into the lungs.

E-cigarettes now take many forms. Some e-cigarettes resemble flash drives, while others are about the size of a credit card. E-juice bottles resemble eye droppers and vape pens come in a variety of colors and resemble pens or lip gloss. E-cigarettes can also be used to deliver other drugs, like marijuana. In 2016, a third of U.S. middle and high school students who had ever used e-cigarettes reported using them for marijuana.

JUUL, a flash drive look-a-like tobacco product popular with teens, comes in kid-friendly flavors like Mango, Fruit, Creme, and Mint. There are also over 15,500 unique e-cigarette flavors available online. In Wisconsin, 89% of high school students say they would not try tobacco products that were not flavored. Even more concerning, the chemicals used to make certain flavors—diacetyl and 2, 3-pentanedione—have been shown to cause irreparable lung disease.

The epidemic use of e-cigarettes is a complicated problem which requires a cooperative effort between partners, organizations, and communities. Many are already working on efforts to combat this crisis, and we now ask for redoubled efforts and increased coordination. We are all in this together. To view recommended actions that parents, teachers, health professionals, and community and state leaders can take to address this issue, go to:

https://www.dhs.wisconsin.gov/tobacco/advisory.htm
EAT RIGHT WHEN MONEY IS TIGHT!

Have you ever found yourself choosing between buying groceries and paying for medicine at the end of the month? Or maybe you’ve found yourself skipping fruits and vegetables and opting for cheaper, less nutritious foods so you have money to pay your utility bill? We believe these are choices no one should have to make. And that’s why we’d like to make sure you are familiar with a benefit you may be eligible for called FoodShare. It’s a monthly benefit deposited on a debit-like card, the QUEST Card, to help with buying food. This can free up money for bills, medications and other necessities. It’s a completely free benefit to those who are eligible. Monthly income limits are effective October 1, 2019 through September 30, 2020. Eligibility is based on income and certain expenses; many people who are working or receiving Social Security are eligible. Plus, claiming FoodShare benefits helps your local community. The USDA estimates that for every $5 spent in FoodShare benefits, about $9 circulates through local businesses and to our farmers. Claiming benefits you are eligible for is a great way to stretch your grocery budget while supporting your local community!

Applying is fast, easy, and confidential. We have a team of FoodShare Outreach Specialists who would be happy to assist you with the process. Call our FoodShare Helpline toll-free at 1-877-366-3635 or locally at 920-644-5448 and we can answer any questions you may have and set up a time to help you apply.

Brrr! With the early onset of winter weather in 2019, it is time to start preparing for emergency weather conditions. Start to plan now to have items on hand in case you cannot get out. Some items to consider include:

- Water
- Frozen Dinners
- Canned soups, stews, spaghetti, tuna
- Peanut butter
- Canned fruits or fruit juices
- Canned or frozen vegetables
- Instant oatmeal, mixes (pancakes, waffles, rice, noodles)
- Dairy products-milk, cheese, yogurt, cottage cheese (these items only keep for about a week)

Aren’t these bags adorable?? A local 4H group recently volunteered their time and skills to decorate home delivered bags for our meal participants. We welcome any group/organization who is looking for something fun to do that will brighten up a homebound senior’s lunch, which is sometimes the only interaction they receive, give the ADRC a call! We supply the bags, you supply the creativity and the joy brought to our seniors!
